Research on Economic Inequality vol.27, K. Decancq and P. Van Kerm (eds),

Emerald Publishing, 2019.

Table 1 : Descriptive statistics of the main variables (pooled 2010–2018 samples).¹

Variable	Obs.	Mean	Std. Dev.	Min.	Max.
BRE [between 0 and 10]	21,552	4.73	2.62	0	10
Unemployment per province [in %]	21,552	21.47	6.65	8.02	40.79
Male	21,552	0.49	0.50	0	1
Married	21,552	0.53	0.50	0	1
Presence of young children	21,552	0.29	0.45	0	1
Age [in years]	21,552	48.32	17.70	18	99
Migrant background	21,552	0.03	0.17	0	1
Unemployed	21,552	0.18	0.39	0	1
Very low education	21,552	0.06	0.23	0	1
Low education	21,552	0.42	0.49	0	1
Medium education	21,552	0.14	0.34	0	1
High education	21,552	0.17	0.37	0	1
Very high education	21,552	0.21	0.41	0	1
Ideology [between 1 and 10]	16,535	4.67	1.90	1	10
Left	21,552	0.35	0.48	0	1
Conservative	21,552	0.12	0.33	0	1
Socialist	21,552	0.14	0.35	0	1

¹ The number of observations corresponds to the samples used for the regressions, i.e., after the elimination of observations with missing information on one of the variables.
